

HOW IT WORKS

You're planning your wedding - how exciting! Florals are such a fun part of your special day, and we're so excited to work with you. Each bride has their own unique vision and budget, and we are here to bring that to life! Whether it be simple or complex, we welcome it all, holding space for everyone's vision. We have three different packages available - our hope is that one will work for you!

Our **simple** package is for brides that are looking for something that is just that - simple in design and affordable. These packages include arrangements and designs that are built off of our standard recipe, by beginner level designers. This allows for your colour creativity, but adheres to a simple, predictable design.

The **detailed** package is for those that are looking for something a little more advanced, with some creative freedom. Arrangements and designs in these packages are created by our intermediate designers. This allows you the choice of flowers and colours, plus some additional creative say.

Our **visionary** package is for brides with a vision they long to see brought to life. These designs are more complex and will require a designer with more experience and creative expression. If you are looking to have unique shapes, vessels, arrangements, or more, this is the category for you!

SIMPLE
